I have created this blog form in this site for client : <https://asiance.co/>

but client want all the future of blog post which is you seen in second image: basically the second image layout is from a website in which youzify plugin is integrated , but I does not want to integrate youzify plugin because it change complete layout and everything, I just want to change a blog thing please create this for me currently my blog form is as you seen in first image below is current blog code which I use in funtion.php, I just want all the features as you see in second image I marked with red:

code:

```
/* ===== FRONT-END NEW POST FORM (owner only) ===== */
